

Goby Jeyagoby, B.Eng. P.Eng; C.Eng (Australia)

As a Life member, I am standing as a candidate for the Executive Committee Member for JHCA this year. The Committee requires people with a mix of talents and skills. I offer experience, knowledge, expertise in governance in service sector based on my experience gained working for a local government over a number of years.

I have a background in Civil/Structural Engineering in management, planning, policy development, asset management, marketing, corporate affairs, company and local government governance and compliance requirements.

I worked as an Engineer/Project Manager/ Bridge Practice Lead in the Transportation industry in UK, Australia and Canada until early 2020. However, I have now moved onto working for public sector to offer my services to improve quality of life of others (local residents especially). I am passionate about improving life quality of others. If i am elected, I trust this would provide an opportunity to demonstrate my passion to help improve the life of JHC students and the institution. My association with JHC started in 1982 and hope to continue this association for years to come.
